Yersiniosis (except <i>Y. pestis</i>)	4	0	0	0	0	0	0	0	4	0	0	0	0	0	0	0

Notes: Non-resident cases have been excluded. Only incident cases are reported. Cases are counted by date reported to public health. Case counts include both probable and confirmed cases unless otherwise indicated. *E. coli* has included both *E. coli* O157:H7 and Shiga-toxin positive *E. coli* since October 2004. *Haemophilus influenzae* type B includes all invasive *H. influenzae* type B, not just meningitis, as of 1995. Meningococcal includes all invasive disease caused by *Neisseria meningitidis*, not just meningitis. Animal rabies cases are not included. Hepatitis E has been reported separately from Hepatitis non-A non-B beginning in 1998. In 2013, a change in testing methods for coccidioidomycosis occurred at a large laboratory, accounting for a decline in reports. A change in the criteria for counting Lyme disease in 2013 may account for the increase in cases in that year.
